Blackwood, NJ | U.S. Citizen

Education

Camden County College — Blackwood, NJ

Associate of Science in Computer Science — *2025 – May 2027 (expected)*

- Planned transfer: Rutgers University–New Brunswick, Computer Science (Fall 2027)
- Coursework: C++, Computer Science I, Discrete Mathematics, Computer Organization (x86 assembly), Calculus II, Calculus-based Physics I & II

Experience

Software Developer (Contract, Part-Time) — Feb. 2026 – Present

PuckPro Media — *Blackwood, NJ (Remote)*

- Build and operate the in-house software for a hockey media business, from self-hosted services to internal tools
- Designed and self-host a CRM agent integrating Hermes, Discord, and BlueBubbles that tracks leads, automates text follow-ups, and flags calls with notes
- Built a scheduling service for videographers integrated with the CRM for booking and job status
- Built a tool that lets staff generate shareable player recruiting sites from an admin dashboard

Projects

Spartan Roof Inspection | *Go, Wails, SQLite, ONNX* | GitHub — 2026

- Built an offline desktop app that runs local hail-damage detection on roof photos and generates claim PDF reports
- Wrote the Go backend: ONNX inference, letterbox preprocessing, NMS, SQLite/sqlc persistence, and PDF pagination
- Shipped Windows installer with bundled model/runtime; added tests for coordinate mapping, NMS, and project deletion

ESP32 Dog Button | *C++, ESP32, Python* | GitHub — 2026

- Wrote embedded C++ (Arduino) firmware for an ESP32 that reads a GPIO button input, debounces with a cooldown, and sends an HTTP POST over WiFi
- Built a small Python server that receives device events, logs presses, and sends a notification

Technical Skills

Languages: C++, C, Go, Python, SQL, TypeScript

Hardware/Platforms: ESP32, GPIO, WiFi, ONNX Runtime, Wails

Developer Tools: GDB, Git, Linux, NixOS, Neovim, SQLite, PostgreSQL
